UNIVERSAL 3D TV EYEWEAR

TV Compatibility

3D3 Universal 3D TV Eyewear is designed to function with TVs using Active Shutter technology. Compatibility can be checked by visiting 3d3.co.uk/compatibility.

PREPARE FOR INSTALLATION

- Ensure that only the TV you wish to use with the 3D3 Eyewear is switched on.
- Set the TV to 3D mode (refer to the TV operating instructions).
- Stand less than 1 metre from the TV.

INSTALLATION

- With the 3D eyewear switched off, press and hold the function button for five seconds. The indicator light will flash until the 3D signal is detected and then extinguish. You should now be viewing 3D images.
- If the 3D signal has not been detected, check that there is nothing blocking the signal from the TV to the eyewear and repeat the process.

CHARGING

- When the battery is low, the blue indicator light will flash for approximately five seconds when switching on. Connect the supplied cable to the charging port and the other end to any suitable USB charger or port on a TV, laptop or desktop computer. The indicator light will illuminate red until fully charged and then extinguish.

OPERATION

- **Power On** - Press and release the function button, the indicator light will illuminate blue for approximately five seconds and then extinguish.
- **Power Off** - Press and hold the function button for approximately three seconds until the blue indicator flashes three times and then extinguishes.
- **3D Mode switch (optional on IR TVs only)** - Some 3D TVs allow the 3D image to be reversed or inverted. While watching 3D images, press the function button once. Press the function button again to return to the previous state.
- **3D Mode switch (RF Bluetooth TVs only)** - While watching 3D images, double-click the function button to switch to the mode most suited to your TV.

Mode 1 - the blue indicator light illuminates continuously for five seconds

Mode 2 - the blue indicator light illuminates in a series of five double-flashes one second apart for five seconds.

SAFETY PRECAUTIONS

- Ensure appropriate adult supervision at all times when children are using 3D Eyewear.
- Sit an appropriate distance from the TV to minimise eye strain.
- Using 3D Eyewear for extended periods of time may result in symptoms such as headaches, fatigue or dizziness. Take regular breaks if you experience any adverse effects.
- Seek professional medical advice if you experience any adverse effects that do not subside after stopping 3D viewing.
- Ensure that children are asked whether they feel any adverse effects during and after 3D viewing.
- 3D viewing is not recommended for people in poor physical or mental condition, under the influence of alcohol or feeling nauseous.

SAFETY PRECAUTIONS

- 3D TV is an immersive experience and can startle viewers. You should consider this if pregnant, elderly, epileptic or if suffering from any serious physical condition.
- Be aware of objects around the viewing position to avoid damage or injury. 3D viewing can alter the perception of distance.
- Only use the 3D Eyewear for their intended purpose.
- 3D Eyewear should not be exposed to direct sunlight, heat, fire or water.
- Do not bend, drop or apply force to any part of the 3D Eyewear.
- Clean the 3D Eyewear with a soft, dry cloth. Do not use cleaning fluid, spray, chemicals, solvents, surfactants or lubricants.

DISPOSAL

The 3D Eyewear contains a lithium-ion polymer rechargeable battery which should be removed before disposal.

Please discard according to local regulations. Used electrical and electronic products should not be mixed with general waste. Please dispose of this product only in designated national waste electronic schemes.

BATTERY REMOVAL

- Remove the nosepiece and the two screws located near the hinges.
- Separate the inner frame from the outer frame.
- Pull off the battery located on the right hand side, cut off the two wires and insulate them with tape.

RECYCLING

3D Eyewear may be returned to your supplier who will offer responsible recycling.
