

## UNIVERSAL 3D TV EYEWEAR

### Measuring your Pupillary Distance (PD)

1. Ensure your printer settings are set to print at 'actual size.' Do not select 'resize' or 'shrink to fit.'
2. Print this page on the thickest paper or card you have.
3. Check that the ruler in Fig.1 on the printed page lines up perfectly with any ruler you have.
4. Cut out the ruler template along the solid outer line, then fold along the dotted line.
5. Place the ruler template over the bridge of your nose as shown in Fig.2 and write down the PD values for each eye.

TIP - Ask someone to read the values for you or read them yourself looking in a mirror.
